FAQs

What is a QR code?

A QR code (Quick Response code) is a type of matrix barcode (or two-dimensional barcode) first designed in 1994 for the automotive industry in Japan. It's a machine-readable optical label that contains information about the item to which it is attached.

Can I use the generated QR Codes for commercial purposes?

Yes, all QR codes you created with this QR generator are free and can be used for whatever you want.

Are the created qr codes expiring?

They do not expire and will work forever! QR Codes created are static and do not stop working after a certain time. You just can't edit the content of the QR Codes again.

Is there a scan limit for the QR codes?

There is no limit and the created QR code will work forever. Scan it is many times as you wish!

Does QR codes have to be black and white?

Not at all. You can use your brand or company colors, or whatever color you like.
